## IDP FOUNDATIONS

ACCELERATOR

2 WEEKS

In a two-week engagement, Protagona will deploy the infrastructure for a POC document ingestion pipeline on AWS, leveraging Bedrock AI for advanced data verification and correction. The AI document processing will be customized to your specific document type for optimal accuracy.

POC

In this highly collaborative sprint, Protagona will work closely with your team to plan and implement the foundational setup, including definition of initial data sources and document structures, as well as extracted data destinations.

FUNDED

## HOW IT WORKS

**DAY 1:** Kickoff, data gathering, and access

**DAY 3:** IDP Pipeline implementation

**DAY 7:** Document testing and QA

**DAY 8:** Output validation

**DAY 10:** Next steps + recommendations for  
moving from POC to production

### Project Funding:

As an Advanced Tier partner, Protagona is eligible to secure POC funding at this phase and production-level funding once the POC phase is complete.
